

1

Improve the way people make and use energy.

**Our Mission**

2

Build a prosperous company that supports people and the planet.

### Our Story

Southern Energy Management, headquartered in Morrisville, NC, is the Southeast's rooftop solar and building performance expert. Founded in 2001, we've worked for more than a decade to improve the way people—homeowners, businesses, builders, and developers—create, consume, and conserve energy. From the beginning in co-founders Maria and Bob Kingery's living room, to today's team of more than 60 members, our company has prided itself on continuously innovating and leading the energy market forward while maintaining the core values it was founded upon.

## Solar

*Points represent solar installs*

With more than a decade of experience, Southern Energy Management is North Carolina's premiere rooftop solar installer. All of our projects are completed in-house so we have complete control over your project from initial design through final commissioning. We're so confident in our team and methodology that we guarantee the production of our solar systems so you know you're getting the full value of your solar investment.

**800+ solar systems** designed, constructed, and energized

Our systems produce enough electricity each year to power **4,300 homes**

Annual avoided CO<sub>2</sub> emissions equivalent to **25,000 acres** of forest

## Building Performance

Southern Energy Management's building performance services assist developers, architects, and general contractors in navigating the maze of building performance programs available, ensuring that your projects achieve successful verification and program certification. Regardless of whether you're a green building novice or aiming to build a zero energy home, we layout out a clear roadmap and partner with you every step of the way to ensure you achieve your green building goals.

*Points represent locations where we have provided either single family (green) or multifamily (blue) building performance services*

**20,000+ homes** inspected and certified to energy efficiency standards

Consulted, inspected, and certified over **200 multifamily projects**

Certified projects across **12 different** building performance programs in 2015

## B Corp

We learned a long time ago that if we held ourselves to higher standards and took care of our people and the environment, we would rise above the rest. That's why Southern Energy Management decided to become a certified B Corp in 2009. B Corp certification is to business as fair trade is to coffee, or LEED is to buildings; it's a verification program that guarantees better, more sustainable practices. B Corp verifies that SEM meets rigorous standards in social and environmental performance, accountability, and transparency. To learn more visit our page on the B Corp website: [j.mp/SEM-B-Corp](http://j.mp/SEM-B-Corp)
